

List of Presentations

The assessment of trends in the state of coastal areas

Speranza A.

How can we transfer to the Mediterranean region the lesson we learned from the Indian-Ocean tsunamis?

Tinti S.

Risks from wave overtopping of coastal zones and structures

Moutzouris C.

Sea water intrusion in coastal aquifers

Mantoglou A.

Protection of RAMSAR Lagoonal Systems

Karantounias G. and Derkas N.

Hot Spots in the Danube River coastal area of the Black Sea System

Adler M.J.

Embankment Dams Safety and Risks for the coastal zone

Bellos C., Tsakiris G. and Ziogas C.

Methodologies of seismic and rainfall induced landslides in a GIS environment

Sakellariou M.

Identifying some environmental issues in the coastal area

Karatzas G.

Monitoring solid transport in the rivers and consequent sand allocation in experiment of artificial shore nourishment

Marzialetti V.

Meteorological Satellite Information in Monitoring Coastal Zones: The case of the National Park of Alonnisos

Dalezios N.

Analysis of sea storm episodes causing coastal erosion along the Emilia Romagna littoral.

Deserti M.

Climate Change and Coastal Zones: An Assessment of Vulnerability in Greece

Doukakis E.

Why Tsunami can be so destructive

Memos C.

A comparison of SAR and leveling data before and after the 1999 Athens earthquake

Kotsis J. and Paradissis D.

Settlement development in coastal areas: A threat or a shield?

Sayas J.P.

Environmental Risks in Coastal areas of Northern Greece

Tsichrintzis B., Sylaios G. and Petalas C.
